

Why Nuspire?

Always Pioneering.
Intelligently Guiding.

Nuspire is a pioneering cybersecurity partner that empowers organizations to stay safe and secure through next-generation services, delivered via an innovative platform that sets new industry standards. With over 25 years of experience, Nuspire revolutionizes the cybersecurity experience by offering tailored solutions that consistently meet clients where they are in their security journey.

Guided by a deep bench of experts and a technology-agnostic approach, Nuspire acts as a true partner and extension of clients' teams. Our people-first approach goes beyond the traditional MSSP model, providing the expertise, capabilities and visibility clients need to remain secure. The result is consistent client retention rates in the high 90th percentile.

The Nuspire Cybersecurity Experience

Intelligent Unification for Unparalleled Protection

Nuspire's integrated solution reimagines how cybersecurity programs are managed. Combining human expertise, advanced AI and state-of-the-art technology, it empowers organizations to not just react to threats, but to *predict and prevent them*.

myNuspire Platform

Access comprehensive cybersecurity management with unparalleled visibility and control:

- Gain holistic visibility across your entire security tech stack.
- Seamlessly integrate with best-in-breed solutions.
- Utilize customizable, persona-based dashboards with actionable insights.

Nutron AI Assistant

Experience transformative cybersecurity management with an advanced AI assistant that goes far beyond a typical chatbot:

- Automate routine tasks for efficient resource allocation.
- Receive instant answers to complex queries with exceptional accuracy.
- Streamline operations through sophisticated automated threat hunting.

Nuspire Mobile App

Enhance your cybersecurity operations on the go with real-time capabilities and insights:

- Achieve real-time visibility into security incidents and critical alerts.
- Manage cases and respond to threats on-the-go.
- Access personalized threat intelligence with actionable notifications.

2 global SOCs

2,500+ businesses served

40 countries global secure device management

97% client retention rate

1 trillion logs analyzed per quarter

3,657 managed firewalls

153,515 endpoints

Over 3,000 myNuspire users, supporting 1500 unique companies

By leveraging Nuspire's intelligent unification approach, organizations can stay ahead of emerging threats, optimize security investments and streamline operations.

Our Services

Nuspire offers a full complement of cybersecurity services to address your organization's specific needs:

Managed Detection & Response (MDR)

Detect attacks immediately with real-time threat detection and 24x7x365 monitoring by expert cybersecurity analysts.

Endpoint Detection & Response (EDR)

Secure every device that accesses your network and remediate threats via best-in-breed EDR technology solutions.

Managed Security Services

Protect your entire network with Nuspire's sophisticated managed security services suite. Optimize gateway management while leveraging vulnerability management for comprehensive visibility into exposures and patch management for seamless application patching. Maximize Microsoft Defender across endpoints and clouds. Augment with continuous dark web monitoring to rapidly detect and mitigate threats.

Cybersecurity Consulting Services

Leverage Nuspire's expert consultants to listen to your needs and formulate an approach to help you create or improve your security strategy. Our services range from vCISO and incident readiness to threat modeling and security posture assessments.

Always Pioneering. Intelligently Guiding.

As your trusted guide, Nuspire helps you confidently navigate the evolving threat landscape. We provide tailored solutions, uncompromising accountability and data-driven intelligence, empowering you to proactively and predictively stay ahead of threats.
